

A large, modern industrial building, likely an aircraft hangar, is shown at night. The building has a long, low profile with a series of tall, narrow windows that are brightly lit from within, creating a strong contrast with the dark exterior and the black night sky. The building's roof is dark and appears to be made of metal panels. Several small, square ventilation ports are visible along the upper side of the building. The foreground is a flat, light-colored surface, possibly a tarmac or parking lot, which is mostly dark. The overall scene conveys a sense of scale and industrial activity.

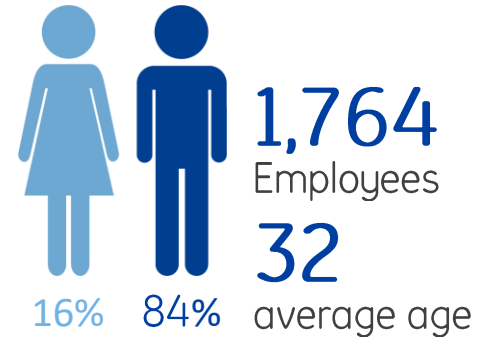

Evolution of MRO Process Using Digital Tools: Paperless Implementation as an Enabler for Efficient MRO Operations

Annual energy
consumption saved

Our Operation

Capacity for **12** continuous lines and growing

2nd largest MRO in Latin America

111 Aircraft delivered last year

Certifications

FAA, DGAC, ANAC, SMS & AS 9110

1.7M+
man-hours

Our Services

B 717

B-737

B 757

MD-80

E-170

E-190

ERJ-145

MD-90

- Airframe & Overhaul to Boeing & Embraer aircraft
- Modifications meeting new market demands (Wi-Fi, Cabin Mod.)
- Advanced NDT services
- Capacity to produce 1.7 M hours a year

2014 - 2017

2014

- One (1) of every three (3) A/C delivered on time
- 100+ days behind planned TAT
- Struggling to meet customer requirements

2017

- Nine (9) of every ten (10) A/C delivered on time
- 40+ days delivered ahead of plan
- Rhythm on execution
- Plan – Adapt – Overcome

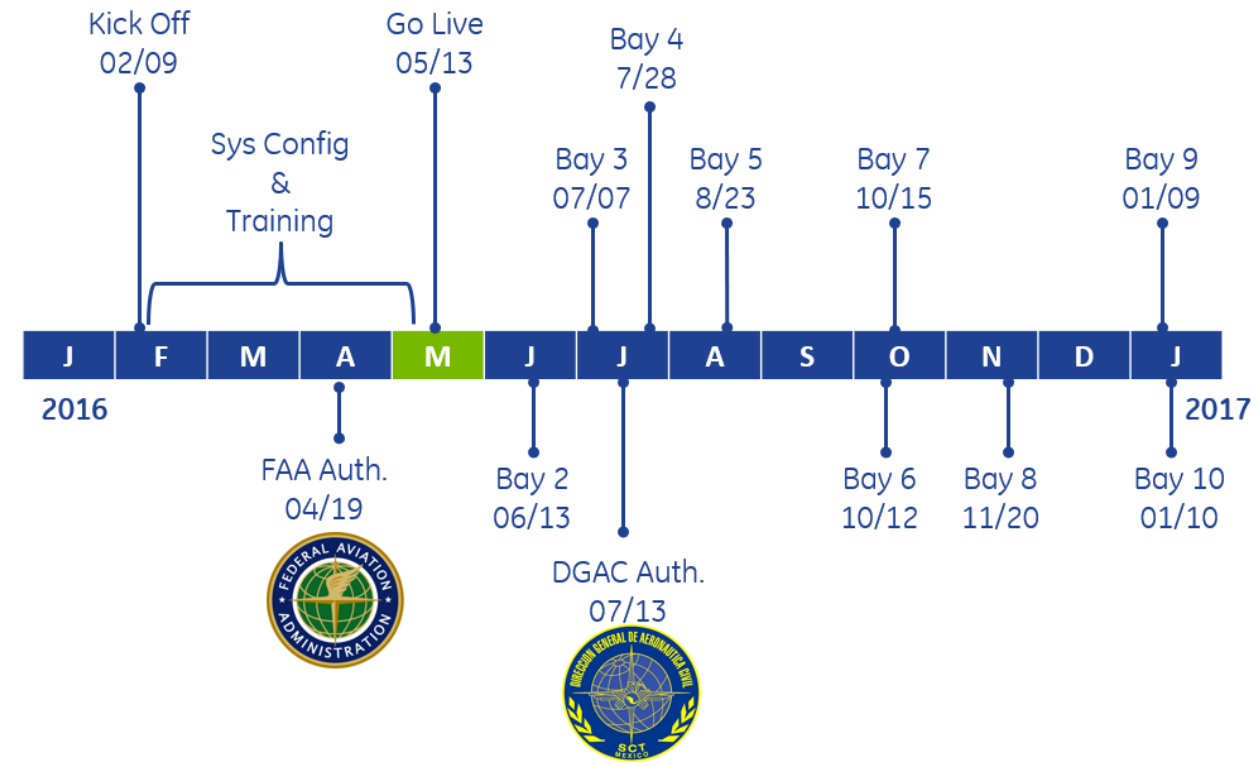

Implementation

FAST

- 14 week implementation to first Line Go Live
- Continuous launch of new lines
- Center on key process
 - Executing to Plan
 - Documenting Maintenance
 - Check Follow up
 - Paperwork Quality & Audit
 - Decision Making
- Cultural change
- Data driven decisions
- Pro-active actions to ensure TAT
- Milestone based planning
- Same information across organization

Before & After EmpowerMX

Area	Before	After
Maintenance	<ul style="list-style-type: none"> Paper documentation Inadequate control on WIP Card status tracking inefficient & time consuming Batch evaluation of NRC Three (3) Systems used to control maintenance Timely data gathering and analysis 	<ul style="list-style-type: none"> Electronic Non Routine Real time follow up on check status & task cards Mechanics work only assigned work Real time Non Routine evaluation Improved Man Hour clock in/out One single System to control maintenance
Planning	<ul style="list-style-type: none"> Activity / Card Count based Manual update on plan status (MS Project) Two days avg. to publish a plan revision 	<ul style="list-style-type: none"> Milestone based project management Real time update of milestone completion Milestone Compliance & Root Cause Analysis facilitation
Invoice	<ul style="list-style-type: none"> Paper bump sheets User defines O&A Cards Inefficient tracking of approval process Time consuming process 	<ul style="list-style-type: none"> Electronic approval process for NRC with customer reps System automatically classifies O&A Cards Real time tracking of Hours approved vs used Approval status tracking
Quality	<ul style="list-style-type: none"> System led to batch Non Routine creation – high WIP No visibility on buyback requirements Buyback process avg. time eight Hrs Missing signatures & date information 	<ul style="list-style-type: none"> Real time Non Routine creation Tracking of inspection queue Buyback process reduced to less than 15 min No missed fields with e-signature

Planning

Executing to Plan

Before
Activity based
Each line had their own plan
2 days avg. to revise a plan
No link between cards & plan
Multiple revisions on floor
No performance metrics

After
Milestone based
Success plans across lines
Hours to revise a plan
Real time updates
Single plan
Milestone compliance & Root cause analysis

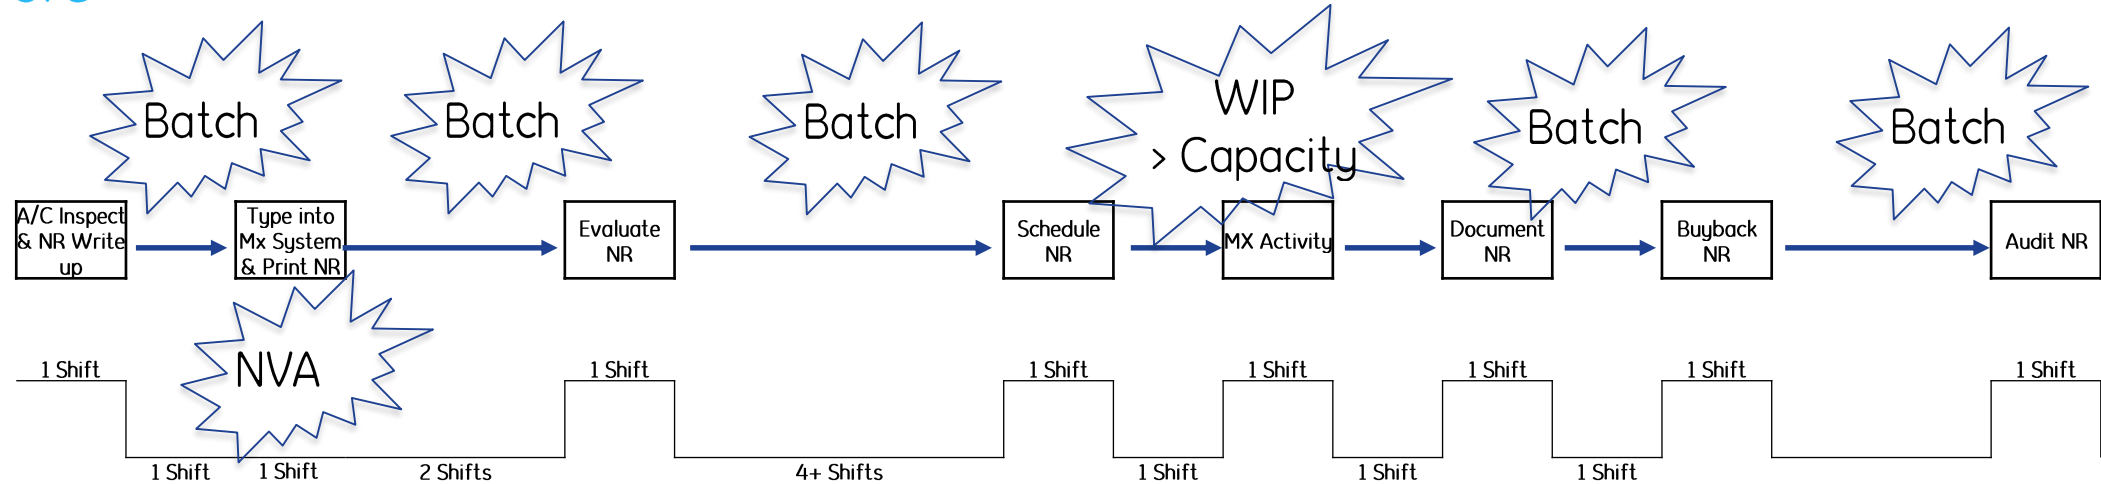

Daily Rhythm & Timely Decisions to meet TAT

Maintenance

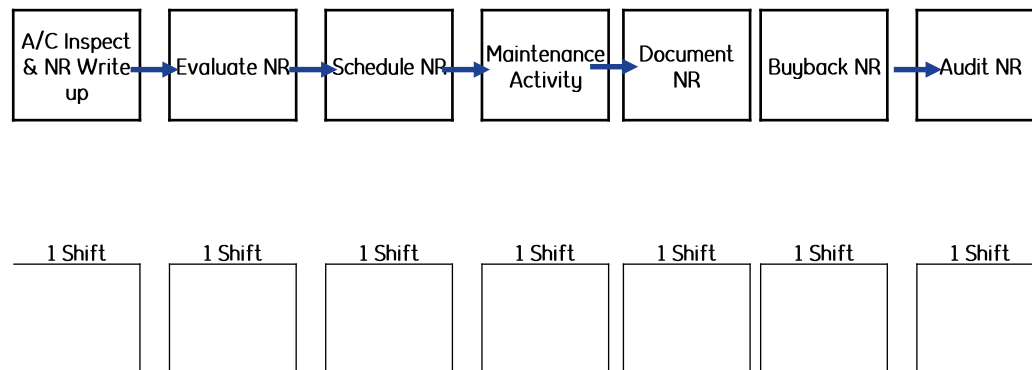

Inspection log book and holding cards

Before

After

- Improved flow of documents
- No Batching of documents
- Improved flow of documents
- Theory of Constraints principles
 - Controller WIP
 - Increased throughput

Documents Quality & Audit

- On a 737 Heavy check NR
 - 4.5K WIP = 9K signatures + 6K mandatory fields
- Electronic Signature guarantees
 - Employee number, License & Date stamp
- Audit centered on content of the document
- Reduction of 3 days on completing audit
- Quality Improvement programs

55% Avg. Docs Error Reductions

Decision Making – Information Driven

- Information a key asset to organization success
- Capability to obtain timely & accurate information
- Most important what to measure
- Measurements will drive organization
- Tell reality of your company
- Drive continuous improvement efforts
- Define, Measure, Analyze, Improve and Control (DMAIC) & Theory of Constraints (TOC) based projects

Process Analysis

- Digital documents provide a reliable source of information
 - Time stamps automatically set
 - Record of users who perform transactions
 - 120+ data points per NRC & 100+ for Technicians
 - Information available once operation is performed
- Data for analysis and decision making
 - Downloadable to Excel
- Key to continuous improvement efforts
- TOMX using 150+ reports in all departments
 - One single source

Inspection log book and holding cards

- TOC applied to identify activities blocking more throughput in the process
- Cards were waiting for buyback attention for more than 1 work shift
- **Actions taken:**
 - Inspectors were removed from activities non-core to their role
 - Dynamic allocation of inspectors based on workload of each line
 - Change of philosophy from “Department” to “Internal Customer Centered”

Results

9 of 10 Aircrafts delivered on Time

40+ Day delivered before Plan

30% Avg. reduction in time to close a card

55% Average reduction in paperwork errors

1 Additional line without adding HC

A large group of people, mostly men in dark blue uniforms with white stripes on the sleeves, are standing in a large formation in front of a massive airplane hangar. The hangar's interior is visible, showing a complex steel truss structure and a large white airplane with a red and blue tail fin. The people are waving their hands. The hangar has large white pillars on the sides and a high ceiling with many lights.

THANK YOU!
