

Material Manager (MM)

Enabling providers to easily implement supply chain controls for stock traceability

EmpowerMX Material Manager is a leading edge supply chain and vendor management solution that provides full control over your materials and tooling as well as the full supply chain. It enables providers to easily implement supply chain controls into their production operations and allows users to greatly improve both parts and supplier management. It is included in the EmpowerMX AERO, MRO, OEM, and Defense solutions—designed to ensure aircraft are fully airworthy and maintained in line with maintenance programs. Material Manager automates the essential asset controls needed to maximize production efficiencies and provides full traceability of all stock throughout its life cycle.

Procurement

EmpowerMX Material Manager provides clear, real-time status visibility of procurement transactions and accurate tracking of approved or restricted vendors.

Stock Movement and Traceability

MM tracks materials from inception to installation and provides a lifetime history of any part. Its robust receiving process features display parts availability via status flags, matches materials to the correct documentation, and ensures that materials have not been made unserviceable during storage or transport.

Inventory Management

MM provides controls to keep inventory levels at preset quantities, automates the ordering and restocking processes, and helps manage the key variables introduced by the needs of the aircraft operator or consignment materials.

Benefits for Airlines, MROs, OEMs and Defense

- Improved efficiency of the asset movement life cycle
- Enhanced customer insight and process interaction
- Increased asset movement process visibility for all users
- Automated tracking of returned stock materials
- Capacity for conducting historical analysis
- Easier invoicing and charge formulations at the accounts payable level with financial mechanisms that automatically tie the cost associated with the part (e.g. freight charges, special handling fees) to an aircraft
- Parts “issued” to task cards automatically adjust inventory levels

ABOUT EMPOWERMX

EmpowerMX is a world leader in providing intelligent maintenance solutions for today's aircraft. We are a global software company that creates innovative aviation maintenance solutions.

Our software solution with its modules enables customers to significantly improve their entire maintenance operation.

Founded in 1999 and headquartered in Dallas, Texas, with offices in Europe and Far East, EmpowerMX is uniquely focused on the aircraft maintenance industry and is managed by aviation maintenance experts.
