

Software Suite

Providing cutting-edge technology solutions for streamlining performance, reducing cost, and sharpening operational efficiencies

EmpowerMX has been designed to assist Airlines; Maintenance, Repair, and Overhaul (MRO) providers; Original Equipment Manufacturers (OEMs); and the Defense industry in the management of their assets including managing and satisfying maintenance requirements, planning and recording maintenance actions, and providing consistent data for reporting and analysis.

Our innovative and intuitive software solutions enable real-time maintenance information from multiple functional areas and locations across the entire business enterprise.

Software Suite

The software suite is modular with any aspect able to operate independently or in conjunction with other EmpowerMX modules or integrate with other 3rd party software.

AERO

The Solution for Aircraft Operators

EmpowerMX AERO software solution is designed to ensure aircraft are fully airworthy and maintained in line with maintenance programs. It provides tools for planning events from a small single defect to a large major check, compiling events into bundles to be sent to third-party maintenance providers or completed internally.

EmpowerMX AERO includes the following modules:

- Maintenance Program Manager
- Line Manager
- Planning Manager
- Material Manager
- Electronic Logbook
- Maintenance Analytics

The background of the slide is a photograph of an aircraft hangar. The hangar is filled with several aircraft, including a large commercial jet in the foreground and smaller planes in the background. The lighting is somewhat dim, and the overall color palette is a mix of greys, blues, and browns, with a dark brown overlay at the bottom. The text is white and stands out against the darker background.

MRO

The Aircraft MRO Solution

EmpowerMX MRO software solution enables MRO providers to achieve a significant improvement in the efficiency of their entire operations by combining all required managers into a bespoke solution.

EmpowerMX MRO includes the following modules:

- Planning Manager
- Production Manager
- Material Manager
- Maintenance Analytics
- Maintenance Program Manager (Optional)
- Electronic Logbook (Optional)
- Line Manager (Optional)

OEM

The Solution for OEMs

EmpowerMX OEM is a leading edge supply chain and vendor management solution that provides full control over your materials and tooling as well as the full supply chain. It enables providers to easily implement supply chain controls into their production operations and allows users to greatly improve both parts and supplier management.

EmpowerMX OEM automates the essential asset controls needed to maximize production efficiencies and provides full traceability of all stock throughout its life cycle.

EmpowerMX OEM includes the following modules:

- Material Manager
- Maintenance Analytics
- Maintenance Program Manager
- Planning Manager (Optional)

Defense

The Defense Solution

EmpowerMX software solutions enable defense providers to achieve a significant improvement in the efficiency of their entire operations. It utilizes EmpowerMX AERO, which helps reduce costs by minimizing aircraft maintenance downtime while maximizing aircraft flight time.

EmpowerMX MRO also helps defense providers to develop and implement smart solutions for improved operations, optimized costs, and increased profitability.

EmpowerMX Defense includes the following modules:

- Maintenance Program Manager
- Maintenance Analytics
- Planning Manager
- Production Manager
- Electronic Logbook
- Material Manager
- Line Manager

ABOUT EMPOWERMX

EmpowerMX is a world leader in providing intelligent maintenance solutions for today's aircraft. We are a global software company that creates innovative aviation maintenance solutions.

Our EmpowerMX software solution with its modules enables customers to significantly improve their entire maintenance operation.

Founded in 1999 and headquartered in Dallas, Texas, with offices in Europe and Far East, EmpowerMX is uniquely focused on the aircraft maintenance industry and is managed by aviation maintenance experts.
