

EmpowerMX Welcomes American Airlines to the Cloud

Empower MX, the leading Aviation Maintenance Platform, has welcomed American Airlines into its cloud-exclusive platform.

Benefits of EmpowerMX's Cloud-Only Platform

American Airlines' migration to a cloud-only aviation maintenance platform has given them the following benefits:

- 
Moved from CAPEX to OPEX
 fully transitioned to an OPEX model for aviation maintenance
- 
Significantly reduced costs
 cloud hosting costs significantly less than the Total Cost of Ownership (TCO) of servers and on-premise maintenance platforms
- 
Aligned supported tools and platforms
 eliminated dependency on internal certifications and vendor approvals (WebSphere vs Tomcat vs Wildfly, JDK versions, and more)
- 
Reduced dependency on IT support
 maintained DB versions as a part of the Cloud solution without impact to their application portfolio
- 
Ensured connectivity, accuracy, and compliance
 utilized web services for integrations with legacy systems and intelligence across all lines of operations
- 
Improved security, uptime, and customer satisfaction
 monthly application updates, including customer requested features and product roadmap developments

Secure, Mobile-ready, and Paperless MRO

- 
Easy Sign-on
 American Airlines can begin using EmpowerMX's aviation maintenance solutions simply by signing on to the platform.
- 
Mobile and Secure
 EmpowerMX is a mobile-ready, constantly updated, and highly secure aviation maintenance platform.
- 
Paperless MRO
 American Airlines can now easily convert task cards to a standard electronic format regardless of the original format – including paper – they initially received.

A fully cloud-based offering allows American Airlines to focus on their core business while EmpowerMX handles their entire workflow and technology in the background.

Why EmpowerMX?

EmpowerMX is a leading cloud-based software platform that is designed to accelerate digital adoption in the Airline, MRO, and Defense establishments. Its product suite helps Engineering and Compliance, Heavy and Line Maintenance, Shop and Materials Management.
